

- Encourage students to grow trees to maintain a clean and green environment in the campus.
- Promote the ethos of water conservation by minimizing the use of water.
- Encourage students to adopt a lifestyle that produces the least amount of waste, separates waste at the source, and disposes of it at the closest storage facility.
- Students should adequately be trained on environment related issues and practices so that they are able to raise awareness among public to prevent the careless burning of waste that results in respiratory illnesses.
- Encourage the students to use paper bags instead of plastic.
- Educate students to not litter public areas as they may clog drains, sewage system.
- Organize Nature Trail in Wild Life Sanctuaries/Parks/Forest areas to know about the Bio-diversity.
