

Eco club seeks to promote environmental awareness at the grassroots level by creating and nurturing green consciousness among the students. Understanding the central role of youth in saving the environment, it encourages them to be ambassadors for spreading the message of adopting an eco-friendly lifestyle in society at large. The eco club, often also known as the green club, is a voluntary group that encourages others to participate in environmental education and improvement. It's a platform on which we got the knowledge about environment. An Eco Club is a means by which students and youth can organize themselves to learn more about environment and also take action to improve it. They offer programs and activities to encourage others to reduce pollution, plant trees, and more. For teachers, it is a wonderful opportunity to create awareness, build attitudes and help students to take up activities in real world which in a way the constraints of the classroom and curriculum will not allow.
